Thematic Areas tackle by RAINCA

S/N	Thematic Area
1	Emission of greenhouse gases
2	Predicting climate hazards and disasters through improved climate modelling
3	Assessment of impacts of climate change and adaptation practices using AI
4	Climate smart agriculture
5	Climate smart cities development
6	Climate change, land use and landscapes
7	Climate change and water resources
8	Climate change and biodiversity
9	Gender
10	Responsible Artificial Intelligence and climate science
11	Climate Change and Renewable Energy
